Market Expansion Readiness

Screening four potential European expansion markets using population and GDP per capita.

	 Czech Republic	 Poland	 Portugal	 Norway
Population	10.5M	38M	10.3M	5.4M
GDP	€25.2K	€18.9K	€24.3K	€80,1K
Market Screening Score*	66.7	50	33.3	50

Market Positioing

Expansion Ranking

Country	Score
1.  Czech Republic	66.7
2.  Poland	50.0
3.  Norway	50.0
4.  Portugal	33.3

Recommendation

1. Czech Republic ranks highest based on the combination of population and GDP per capita.
2. Poland offers the largest population, while Norway has by far the highest purchasing power but a smaller customer base.

* Market Screening Score = 50% population + 50% GDP per capita.

This is a simple screening indicator and does not measure actual hiking-equipment demand. Higher score indicates stronger relative market characteristics among the four candidate countries.
